# PROFESSIONAL SERVICES
APPLICATION DESIGN & DEVELOPMENT

LiveSwitch

Who We Are

LiveSwitch Inc. is a real-time communications company that builds cross-platform SDKs that allows organizations to incorporate WebRTC components into their applications. We work very closely with our clients and partners, helping them to establish an understanding of their own needs and how their requirements can be realized in a modern connected architecture.

What We Do

Our dedicated Professional Services team provides app architecture, design, development and consulting for our 400+ clients worldwide across a wide range of industries and covering all aspects of Real Time Communications including **audio/video streaming, text chat, screen sharing, signaling, broadcasting and much more!** No matter what your need, budget or deadlines require, our team of expert software consultants can help you.

Benefits

- **10+ years of dedicated WebRTC expertise. We have the skills necessary to help you build WebRTC applications that provide a rich user experience.**

- **Professional Services packages can be tailored to meet your budget and business needs.**

- **Provide on-premise solutions that allow you the flexibility to chose what works best for you and your budget.**

- **Provide unparalleled support for a wide range of platforms giving you the flexibility to build what you want, how you want it.**

Professional Services

LiveSwitch Inc. offers three unique levels of Professional Services to assist in the development of your applications.

WebRTC **FastStart**

Ready to start using our products, but lack expertise in WebRTC? Through LiveSwitch's FastStart program you will gain access to an experienced WebRTC Senior Developer for one week who can help your developers in the implementation of LiveSwitch's products.

WebRTC **Assessments**

Not sure what Real-Time communication architecture is best for your solution? LiveSwitch's WebRTC assessment is designed to guide you through. After completing an architecture assessment you will receive a personalized document analyzing your needs, defining architecture recommendations, and much more.

WebRTC **Projects**

Do you lack the internal resources to carry out a complete Real-Time Communications development project? Or have a custom system that needs WebRTC integration? LiveSwitch's Professional Services team of WebRTC experts can help you make your project a success. Whether creating a component of your application or developing a complete end-to-end product, our professional services team has service options that will work for you and your budget.

‹ Project Examples

- **Adobe Flash replacement**

- **Customized on-premise implementation**

- **Legacy application WebRTC video enablement**

- **Web, mobile and embedded WebRTC applications built from the ground up**

- **Complex and unique real-time video integration use cases (ex. broadcasting)**

- **SIP-based telephony integrations**

- **Special virtual classroom conferencing solutions (ex. instructor driven interations & controls)**

- **HoloLens, Vuzix, ODG and HMT smart glasses integrations**
